

SPACE RADIATION INVESTIGATORS' WORKSHOP

Dear NASA Space Radiation Program Colleague:

The 25th Annual NASA Space Radiation Investigators' Workshop, in conjunction with the NASA Human Research Program Investigators' Workshop, will be held February 11–13, 2014, at the Moody Gardens Hotel and Convention Center in Galveston, Texas.

The purpose of this workshop is to provide an opportunity for active researchers in the NASA Space Radiation Program to share the results of their work, interact with scientists in other discipline areas within the Human Research Program, and explore new directions for research that may benefit the NASA program. The workshop format will include plenary sessions, short talks, and poster sessions. We will hold a workshop-wide poster competition to recognize and honor student investigators. In addition, there will be an NSRL Users Group's meeting and sessions on space physics and technology.

Principal investigators receiving NASA funds are **required** to attend. Although attendance at the workshop is by invitation only, other scientists with a legitimate interest in space radiation research are also welcome.

Registration and logistical information are available on the [main workshop website](#).
